

Demand Load Management Program

AEC offers a **Demand Load Management Program (DLM)** to its commercial consumers to help curtail demand charges of individual accounts by controlling usage during peak time periods. During peak season (June 20 to Sept. 9; excluding July 4 and Labor Day), **Peak Hours will be between 4:00 pm and 7:00 pm Central Daylight Savings Time.**

The DLM Program allows commercial accounts to receive a \$6.00/KW credit to curtail their loads from 4:00pm to 7:00pm on peak days called by AEC's power supplier WFEC. This program allows DLM accounts to run 22 hours a day on peak days and 24 hours a day on all other days.

Western Farmers Electric Cooperative (WFEC) will continue to provide AEC notification when a peak day is called during the DLM season. AEC's members have the flexibility of downloading the Smarthub app, signing up to receive a text message, or calling the main office to see if that day is a peak day.

All DLM accounts will be responsible for paying a \$40 annual processing fee. This fee will be added to your January billing statement.

Anyone interested in enrolling their commercial accounts in this program should call Douglas Conrady at 580-366-4582 x127.

If you have any questions about AEC's Demand Load Management Program (DLM), please call Brandon Wright at 580-366-4582 x124 or Kandi Smith at 580-366-4582 x103.
